Annual Primary School Census 2013

Message

I am happy to note that the Directorate of Primary Education has conducted the Annual Primary School Census (APSC) for 2013 and completed the report in time. It is a gigantic task considering the coverage of about 107,000 institutions of different categories both public and private sector delivering primary education in Bangladesh. Over the years Bangladesh has reached a respectable position in primary education compare to many developing countries. However, we have a lot of challenges to improve the quality of primary education. It is our constitutional obligation and the commitment to the international community to ensure quality primary education for all children. The Government of Bangladesh is continuously putting priority to primary education with positive results.

I appreciate the Development Partners for their support through PEDP 2 and PEDP 3 to address the primary education issues comprehensively in Bangladesh and hope that our joint efforts will lead us to achieve the agreed targets within the stipulated time.

I thank the Directorate of Primary Education for conducting the Annual Primary School Census regularly and publishing this very useful report.

Joy Bangla
Long live Bangladesh

Mostafizur Rahman
Minister
Ministry of Primary and Mass Education
Governments of the Peoples' Republic of Bangladesh

Message

Primary education is the right of all children according to the UN Convention of the Rights of Child and it is also the constitutional obligation of the Government of Bangladesh. Accordingly Bangladesh has enacted the Compulsory Primary Education Act in early nineties and continuously putting primary education in its due priority in the national plan and budget allocation.

Through the Annual Primary school Census (APSC) we may have a glimpse of various aspects of primary education in Bangladesh. It gives us an impression of the performance of a school, a Upazila, a district, a division and at the national level in terms of different agreed indicators and thus help us identify the good performing and low performing schools and areas which is very useful for planning and programming purposes. The data of the APSC is a very reliable sources of latest information of primary education not only to the government but as well as for the NGOs, academic and research institutions, Development Partners and so on. The historical data also indicates the trend of primary education performance over the years and that reflects as a whole a positive and steady progress in the sector.

I congratulate and thank the Directorate of Primary Education, its staff & officials and the teachers for conducting the census and publishing the report of APSC 2013.

Quazi Akhter Hossain
Secretary
Ministry of Primary and Mass Education
Government of the Peoples' Republic of Bangladesh

Preface

The Directorate of Primary Education has finished the Annual Primary School Census (APSC) for the year 2013 and published the report. It is a continuous process since it began in 2005. This year the APSC has covered about 107,000 schools of different categories both in government and non-government sectors. To make a complete count of all types of schools spread all over the country is a colossal task that the DPE has successfully accomplished.

As agreed between the Govt of Bangladesh and the Development Partners in the Third Primary Education Development Programme, the primary education data is collected now in line with two sets of indicators - Key Performance Indicators and Primary School Quality Level indicators – KPIs and PSQLs.

Primary education sub-sector performance is monitored through KPIs and PSQLs, which are reflected in APSC reports. APSC 2013 report indicates a positive trend in achieving many of the KPIs and PSQLs such as participation, completion, GER and NER. An example is worth noting - putting the statistics of 2008 and 2013 side by side it is observed that the drop out rate has come down from 49% to 21.4%, repetition rate from 11.6% to 6.9% , Year Input Per Graduate (YIPG) from 8.6 years to 6.3 years whereas the completion rate has increased to 78%.

We must recognize that we could not achieve the target - "Quality education for all children" to which we started our journey, but the statistics makes us optimistic as it indicates primary education of Bangladesh is pacing onward gradually towards quality improvement.

I commend and thank all the teachers, education providers, actors of education for their commitment in overall development of primary education. My sincere thanks to the officials of DPE both at the field and HQ for their contributions towards carrying out the census and publishing the report. I also like to express my appreciation to the Monitoring and Evaluation Division and Information Management Division for their efforts to manage such a huge and complex data and publish the report on time.

Shyamal Kanti Ghosh
Director General
Directorate of Primary Education
Ministry of Primary and Mass Education

Acknowledgement

The objective of Annual Primary School Census is to collect data from all types of institutions delivering primary education in Bangladesh to observe the primary education situation in terms of the agreed indicators to monitor the progress and trends and thus to help planning and management. The APSC mainly focuses on pre-primary education, access and participation in primary, internal efficiency of the system and teachers' information.

I acknowledge and appreciate the contributions of Divisional Deputy Directors, District Primary Education Officers, Upazila Education Officers, Assistant Upazila Education Officers, Data Entry Operators and Teachers who were involved in the process of APSC 2013. I would like to extend my sincere thanks to the colleagues of DPE particularly the Monitoring and Evaluation and Information Management Divisions and the Consultants for their hard work in data processing and preparing this report.

I would also like to express my sincere gratitude to the Director General of DPE, members of the Technical Committee and National Committee on Primary Education Statistics for their valuable comments and suggestions for improving the APSC 2013 report.

Md. Emran
Director (Joint Secretary)
Monitoring & Evaluation Division

Glossary

I. Access:

Definition: Access means a channel, a passage, an entrance or a doorway to education. It has a two-way role:

(i) A physical approach;

(ii) Utilization of existing facilities: It is not only essential to provide education facilities but it is equally important that these facilities are utilized.

Purpose: To provide access for all children to primary education as per the national policy and where it would not be possible to provide, alternative schooling should be introduced for their teaching learning at comparable level.

II. Class size:

Definition: The average number of students enrolled per class.

Purpose: To measure the average number of children being taught together at one time. The results can be compared with established national norms.

Calculation method: Divide the total number of students enrolled by the total number of classes.

III. Coefficient of efficiency:

Definition: The ideal (optimal) number of pupil years required (i.e. in the absence of repetition and dropout) to produce a number of graduates from a given schools cohort for primary education expressed as a percentage of the actual number of pupil years spent to produce the same number of graduates

Purpose: This is an indicator of the internal efficiency of an educational system. It summarises the consequences of repetition and dropout on the efficiency of the educational process in producing graduates

Calculation method: Divide the ideal number of pupil years required to produce a number of graduates from a given schools cohort for the specified level of education by the actual number of pupil years spent to produce the same number of graduates, then multiply the result by 100. The coefficient of efficiency is calculated on the basis of the reconstructed cohort method, which uses data on enrolment and repeaters for two consecutive years.

IV. Cohort completion rate for primary education (CCR):

Definition: Percentage of a cohort of pupils enrolled in the first grade of primary education in a given schools year expected to complete primary education. The CCR is the product of the probability of reaching the last grade (survival rate) and the probability of graduating from the last grade.

Purpose: To assess the likelihood that pupils of the same cohort, including repeaters, complete primary education.

Calculation method: Divide the number of graduates from primary education in a given year by the difference between enrolment in the last grade in the same year and repeaters in the last grade in the following year, then multiply the result by the survival rate to the last grade of primary education in the given year, and then multiply by 100.

V. Dropout rate by grade:

Definition: Proportion of pupils from a cohort enrolled in a given grade in a given schools year no longer enrolled in the following schools year.

Purpose: To measure the phenomenon of pupils from a cohort leaving schools without completion and its effect on the internal efficiency of educational systems. In addition, it is one of the key indicators for analysing and projecting pupil flows from grade to grade within the educational cycle.

Calculation method: Dropout rate by grade is calculated by subtracting the sum of promotion rate and repetition rate from 100 in the given schools year. The **cumulative dropout rate in primary education** is calculated by subtracting the survival rate from 100 at a given grade (see *survival rate*).

VI. Ebtedyee Madrasah:

Definition: The level of Madrasah system offering education equivalent to the primary level of general education. It offers both religious and general education instruction to Muslim students.

VII. Equity

Definition: Equity means equitable access to and participation in all management and program functions regardless of special characteristics including but not limited to gender, race, colour, national origin, disability and age.

VIII. Graduate:

Definition: A pupil or student who successfully completes a level of education, such as primary education.

IX. Grade Transition

Definition: In education, grade transition is the number of a cohort of pupils who enters first grade of primary education and who experience promotion, dropout and repetition from grade to grade, i.e., how many of them roll over to the next grade, next year and so on, and thus complete a particular level or stage of education.

X. Gross enrolment rate (GER):

Definition: Total enrolment in a specific level of education, regardless of age, expressed as a percentage of the eligible official schools-age population (6–10 years in Bangladesh) corresponding to the same level of education in a given schools year.

Purpose: To show the general level of participation in a given level of education. It indicates the capacity of the education system to enrol students of a particular age group. It can also be a complementary indicator to NER by indicating the extent of over-aged and under-aged enrolment.

Calculation method: Divide the number of pupils (or students) enrolled in a given level of education regardless of age by the population of the age group, which officially corresponds to the given level of education, and then multiplies the result by 100.

In Bangladesh, GER is over 100% due to the inclusion of over-aged and under-aged students because of early or late entrants and grade repetition. In this case, a rigorous interpretation of GER needs additional information to assess the extent of repetition, late entrants, etc.

XI. Gross intake rate:

Definition: Total number of new entrants in the first grade of primary education, regardless of age, expressed as a percentage of the population at the official primary schools-entrance age (6 years in Bangladesh).

Purpose: To indicate the general level of access to primary education, it also indicates the capacity of the education system to provide access to grade 1 for the official schools-entrance age population

XII. Net intake rate:

Definition: New entrants in the first grade of primary education who are of the official primary schools-entrance age (6 years in Bangladesh), expressed as a percentage of the population of the same age. To precisely measure access to primary education by the eligible population of primary schools- entrance age.

XIII. Net enrolment rate (NER):

Definition: Enrolment of the official age group for a given level of education (6–10 years in Bangladesh) expressed as a percentage of the corresponding population.

Purpose: To show the extent of coverage in a given level of education of children and youths belonging to the official age group corresponding to the given level of education.

Calculation method: Divide the number of pupils enrolled who are of the official age group for a given level of education by the population for the same age group and multiply the result by 100.

This indicator is difficult to calculate accurately, partly because data on the exact birth date of students is needed to precisely determine whether they are part of the official age group. Age data are usually reported in whole years and even then are often inaccurate. In Bangladesh, children must be six years old on a specific date in January to be eligible to enrol in Grade 1 of primary schools. If data are collected a few months into the schools year, say in March, and then some Grade 1 children from the eligible entry cohort (i.e. not over-age) will already be seven years old.

Although the NER cannot exceed 100% by definition, in Bangladesh values up to 105% have been obtained for district NERs and in these cases there are inconsistencies in the enrolment and/or population data.

XIV. New entrants:

Definition: Pupils who enter Grade I of primary education for the first time.

XV. Primary education (formal):

Definition: Refers to education, as determined by the government for the children of age group 6⁺ to 10⁺ years in grades 1 to 5 having a prescribed national curriculum, textbooks, schools hours and the schools year, which begins in January and ends in December.

XVI. Out-of-schools children

Definition: Out-of-schools children are those children in the official schools age group who are not enrolled in schools. These comprise dropouts and never enrolled children.

XVII. Promotion rate by grade:

Definition: Proportion of pupils from a cohort enrolled in a given grade in a given schools year those studies in the next grade in the following schools year.

Purpose: To measure the performance of the education system in promoting pupils from a

cohort from grade to grade, and its effect on the internal efficiency of educational systems. It is also a key indicator for analysing and projecting pupil flows from grade to grade within the educational cycle.

Calculation method: Divide the number of new enrolments in a given grade in a given schools year ($t+1$) by the number of pupils from the same cohort enrolled in the preceding grade in the previous schools year (t).

XVIII. Pupil cohort:

Definition: Pupil-cohort is a group of pupils who enter the first grade of a level of education in the same schools year and subsequently experience promotion, repetition, drop-out each in his or her own way

XIX. Pupil year:

Definition: A non-monetary measure of educational inputs or resources. One pupil year denotes the resources spent to maintain a pupil in schools for one year.

XX. Repetition rate:

Definition: Proportion of pupils from a cohort enrolled in a given grade in a given schools year those studies in the same grade in the following schools year.

Purpose: To measure the rate at which pupils from a cohort repeat a grade, and its effect on the internal efficiency of educational systems. In addition, it is one of the key indicators for analysing and projecting pupil flows from grade to grade within the educational cycle.

Calculation method: Divide the number of repeaters in a given grade in a given schools year ($t+1$) by the number of pupils from the same cohort enrolled in the same grade in the previous schools year (t).

XXI. Student-Teacher Ratio (STR):

Definition: Average number of pupils (students) per teacher at a specific level of education in a given schools year.

Purpose: To measure the level of human resources input in terms of the number of teachers in relation to the size of the pupil population. The results can be compared with established national norms on the number of pupils per teacher.

Calculation method: Divide the total number of pupils enrolled at the specified level of education by the number of teachers at the same level.

XXII. Survival Rate:

Definition: Percentage of a cohort of pupils (or students) enrolled in the first grade of a given level or cycle of education in a given schools year expected to reach successive grades, regardless of repetition.

Purpose: To measure the retention capacity and internal efficiency of an education system. It illustrates the situation regarding retention of pupils (or students) from grade to grade in schools, and conversely the magnitude of dropout by grade.

Calculation method: Divide the total number of pupils belonging to a pupil cohort who reached each successive grade of the specified level of education by the number of pupils in the schools cohort, i.e. those originally enrolled in the first grade of primary education, and multiplies the result by 100. Current survival rates can be estimated using the **reconstructed cohort method**. This technique calculates the survival rate for a theoretical cohort of children who experience the current promotion, repetition and dropout rates at each grade as they move through the schooling system. It uses data on enrolment and repeaters for two consecutive years.

XXIII. Schools life expectancy:

Definition: Schools life expectancy for a child of certain age is defined as the total number of years of schooling which the child can expect to receive in the future, assuming that the probability of his or her being enrolled at schools at any particular future age is equal to the current enrolment ratio for that age. It is the sum of the age specific enrolment ratios for primary, secondary and higher education

XXIV. Transition rate:

Definition: The number of pupils (or students) admitted to the first grade of a higher level of education in a given year, expressed as a percentage of the number of pupils (or students) enrolled in the final grade of the lower level of education in the previous year.

Purpose: To convey information on the degree of access or transition from one cycle or level of education to a higher one. Viewed from the lower cycle or level of education, it is considered as an output indicator. Viewed from the higher educational cycle or level, it constitutes an indicator of access. It can also help in assessing the relative selectivity of an education system, which can be due to pedagogical or financial requirements.

Calculation method: Divide the number of new entrants in the first grade of the specified higher cycle or level of education by the number of pupils who were enrolled in the final grade of the preceding cycle or level of education in the previous schools year then multiply by 100.

XXV. Years input per graduate:

Definition: The estimated average numbers of pupil years spent by pupils (or students) from a given cohort who graduate from primary education, taking into account the pupil years wasted due to dropout and repetition. One schools year spent in a grade by a pupil is equal to one pupil year.

Purpose: To assess the extent of educational internal efficiency in terms of the estimated average number of years to be invested in producing a graduate.

Calculation method: Divide the total number of pupil years spent by a pupil cohort (graduates plus dropouts) in the specified level of education by the sum of the successive batch of graduates belonging to the same cohort. This indicator is estimated using the reconstructed cohort method, which uses data on enrolment and repeaters for two consecutive years.

XXVI. Graduate:

Definition: Graduate is a pupil or student who successfully completes a level of education, such as primary education, elementary education etc.

XXVII. Urban area:

Definition: Refers to the area covered by municipalities, Upazila headquarters, District headquarters and City Corporations in the country

Executive Summary

This report contains the major findings of the Annual Primary School Census (APSC) in Bangladesh conducted during 2013 by the Directorate of Primary Education. The purpose of the census is to provide updated information and compare it with the Second Primary Education Development Program (PEDPII) and Baseline Survey data conducted in 2005. Afterwards, Seven Annual Primary School Census reports have been published (2006, 2007, 2008, 2009, 2010, 2011 & 2012). The informations of APSC serve as the latest data against two sets of indicators namely Key Performance Indicators (KPIs) and Primary School Quality Level (PSQL) indicators. KPIs are outcome level indicators whereas PSQLs are output level indicators i.e. physical facilities used to provide an appropriate and enabling teaching-learning environment in the schools for quality primary education. Policymakers, Planners, Managers and Development Partners (DP) of the PEDP3 may use this information for monitoring the progress of various interventions and plan for the future.

The main purpose of the Annual Primary School Census (APSC) 2013 are: (i) To provide an updated information of the situation of the primary education sector of Bangladesh to the Policy makers, DPs and other stakeholders so that they can easily track and monitor the progress of various interventions undertaken during PEDP3.(ii) To provide a working document for the different levels of decision makers to monitor the activities being carried out and (iii) To provide the latest data to plan for the future.

The Head Teachers were oriented on the APSC data collection methodology and they were given an instruction/guidelines on filling up the questionnaire. They filled up the well-designed questionnaire to provide the schools data as the basic unit of data collection of the APSC. The AUEOs and the UEOs supervised and ensured the quality of data collection process. The computer operator of URC inserted the data, which was sent to the IMD of DPE HQ. IMD has checked & cleaned the data, processed and prepared the tables for the report.

The structure of APSC 2013 report is intentionally kept similar to the previous year (ASC-2012) report for the convenience of the readers. It incorporates tables and figures in order to disseminate the data distinctly. Data of APSC serves as an important source of detail information for the preparation of the Annual Sector Performance Report (ASPR).

The following paragraphs summarize the most important findings of the APSC 2013 compare to the Baseline survey findings (2005):

- The Ministry of Primary and Mass Education (MoPME) controls more than 64% schools, and around 80% of total children enrolled in those schools where about 69.2% primary teachers are working.
- The apparent/gross intake rate in the formal primary education system in 2013 is 112.0 % (Boys 111.5% and Girls 112.6%); and the net intake rate is 97.8% (Boys 97.5% and Girls 98.2 %). In the PEDPII Baseline Survey (2005), the apparent/gross and net intake rates were 108.4% (Boys 105.9% and Girls 111%) and 94.7% (Boys 93.3% and Girls 96.1%) respectively. These figures indicate that some children enrolled in the formal primary education system are either under-aged or over-aged.
- Total enrolment of children to Pre-primary is 2,962,063. Among them, Boys are 1,511,602 and Girls are 1,450,461 in 2013. So far 81,798 schools have introduced pre-primary (77%) and of them 37,235 GPS, 19,817 RNGPS and 1,679 NRNGPS.

- The gross and net enrolment rates in the primary education system in 2013 is 108.6% (Boys 106.8% and Girls 110.5%) and 97.3% (Boys 96.2% and Girls 98.2%) respectively, whereas in the PEDPII Baseline (2005) GER was 93.7% (Boys 91.2% and Girls 96.2%) and NER was 87.2% (Boys 84.6% and Girls 90.1%).
- The average absenteeism in the year 2013 is 13.7 % compared to 23% in 2005. It indicates that students attendance is gradually improving.
- The overall dropout rate in the year 2013 is 21.4 % whereas it was 47.2% in the year 2005. This reduction in dropout rate indicates effectiveness of the system is improving.
- The student teacher ratio is 42:1 in the year 2013 for all type of schools, but it is 49:1 in GPS and RNGPS which is still below the national target (46:1).
- There are 8178 GPS and 591 RNGPS only running in a single shift.
- Total enrolment of children with special needs (disabilities) in the primary schools is 112,444. Among them, 61,807 are Boys and 50,637 are Girls in 2013. In GPS and RNGPS, total enrolment of children with special needs (disabilities) is 82,708 among them, 45,858 are Boys and Girls 36,850.
- While the figures of APSC-2013 show some satisfactory levels of access and participation, these figures also indicate that there are still challenges in some areas. This report shows that the overall repetition rate is 6.9%; survival rate to grade five is 80.5%. Efficiency remains at a 79.7% level and the average number of years input per graduate is 6.3. In the Baseline survey (2005), the overall repetition rate was 10.5%, rate of survival to grade five was only 53.9%, efficiency was 60.6%. The findings of the present report indicate all the above-mentioned indicators are improving gradually.

A third party validation survey has been conducted in 600 sample schools in seven divisions to check the quality of the APSC 2013. The validation survey was conducted by the Foundation for Research on Educational Planning and Development (FREPD). After analyzing the data the study team has recommended that the overall quality of the APSC-2013 is reasonably high. The mean error (-0.45) is statistically insignificant. A brief report of the data validation survey is attached in the ANNEX-F.

Some Key Findings of the APSC 2013 at a glance

Indicators		2013
No. of schools covered		106859
Teachers	Male	200732
	Female	265776
	Total	466508
Students	Boys	9780952
	Girls	9804020
	Total	19584972
Pre-Primary Enrolment	Boys	1511602
	Girls	1450461
	Total	2962063

	Girls	98.5
	Total	98.5

Chapter One

Introduction

Background

Bangladesh is committed to the rights of basic education for all children, as clearly stated in the constitution, “The state shall adopt effective measures for the purpose of establishing a uniform, mass oriented and universal system of education and extending free and compulsory education to all children to such stage as may be determined by law”. Acknowledging primary education as a state responsibility and recognizing the fundamental rights of the people to education usher the nation towards a new era in Bangladesh. Since its independence, Bangladesh has undertaken many initiatives to improve its education system in line with its national development objectives.

The primary education system in Bangladesh is one of the largest systems in the world. The country has undertaken a number of measures to improve primary education since its independence. Commendable progress in access and gender equity is the major achievements of those efforts. But in terms of quality of education, student learning achievement and reduction of drop out Bangladesh has not yet made similar breakthroughs.

With a view to improving the quality of primary education, the Government of Bangladesh has undertaken an integrated sub-sector wide programme known as PEDP since 2005 with the assistance of development partners. Now the Third phase of the programme (PEDP 3) for 2011-2016 is running to improve the quality at all levels in the primary education sub sector. The key objectives of the PEDP 3 are:

- ❖ To improve the quality of primary education in Bangladesh through the introduction of Primary Schools Quality Level (PSQL) standards;
- ❖ To make primary education accessible for all children in Bangladesh;
- ❖ To increase enrolment, attendance and the rate of completion of the primary education cycle;
- ❖ To adopt a child-centred approach in the classroom;
- ❖ To fully integrate the PEDP3 activities within the organizational and operational systems of the Ministry of Primary and Mass Education and the Directorate of Primary Education;
- ❖ To undertake institutional reforms in education planning, management, and its effective decentralization and the devolution of decision making authority;
- ❖ To strengthen and build the capacity of the schools management system at all levels;
- ❖ To ensure accountability and transparency at all levels;
- ❖ To supply textbooks and teaching- learning materials free of cost; and
- ❖ To strengthen role of the community particularly parents, for running and supporting their schools;

The PEDP3 documents mentioned a set of Key Performance Indicators (KPIs) and Primary Schools Quality Level (PSQL) indicators to monitor the progress of the provision of inputs under the programme and provide the basis for measuring the improvement in quality of the primary education sub-sector.

A set of KPIs and PSQL indicators has been adopted for measuring the primary education sector performance and information to be collected through regular monitoring of the programme intervention based on M&E matrix. The list of KPIs and PSQLs are as follows:

KPI	PSQL
1. Level of achievement in Grade 3: mean score (Boys and Girls)a. Bangla b. Mathematics	1. Percentage of schools which received new textbooks within the first month of the year
2. Level of achievement in Grade 5: mean score (Boys and Girls) a. Bangla b. Mathematics	2. Percentage of (assistant and head) teachers with professional qualification (C-in-Ed/Dip-in-Ed, B.Ed., M.Ed.)
3. Grade 5 examination pass rate (Boys and Girls)	3. Percentage of (assistant and head) teachers who receive continuous professional development training
4. Number of children out of schools (Boys and Girls) 6–10 years old and 11–14 years old	4. Number of enrolled children with disabilities (GPS & RNGPS)
5. GER, primary education (Boys and Girls)	5. Percentage of schools with separate functioning toilets for Girls
6. NER, primary education (Boys and Girls)	6. Percentage of schools with at least one functioning toilet
7. [Participation] Gender parity index of GER	7. Percentage of schools with potable water
8. [Participation] NER – Range between top 20% and bottom 20% of households by consumption quintile	8. Percentage of schools which depend on water points for water where the water point is in working condition
9. Upazila-level composite performance indicator a. Annual improvement of 20% lowest performing Upazilas b. Range between top 10% and bottom 10% of Upazilas	9. Percentage of schools which have a functioning water point that have potable water
10. Number and types of functions delegated to districts, Upazilas and schools	10. Percentage of classrooms that are in good condition
11. Expenditure of block grants (conditional and unconditional) for Upazilas and schools	11. Percentage of schools that meet the SCR standard of 40
12. Completion rate, primary education (Boys and Girls)	12. Percentage of standard-size classrooms (26'x19'6'') and larger
13. Dropout rate by grade	13. Percentage of classrooms which are in <i>pacca</i>
14. Number of input years per graduate	14. Percentage of head teachers who received training on schools management and leadership training
15. Percentage of schools that meet composite primary schools-level quality indicators	15. Proportion of SMC whose members were trained (at least three members)
	16. Percentage of schools that meet the STR standard of 46
	17. Percentage of schools (GPS) with pre-primary classes
	18. Percentage of schools which receive SLIP grants

Objective of the Annual Primary School Census 2013

The objective of the Annual Primary School Census 2013 is to collect necessary data for measuring progress of the above KPIs and PSQL indicators to update and compare with the baseline to see the trend. The 2005 Baseline Survey provided initial benchmark figures for the above KPIs and PSQL indicators. The Annual Primary School Census 2013 is the latest updated information on the progress made in this sector.

Scope of the Annual Primary School Census 2013

There are twenty-four types of primary level educational institutions offering primary education in Bangladesh have been covered in this census and collected data related to students enrolment, number of teachers, physical infrastructure including other facilities etc. of the schools.

Methodology

The methodology of Annual Primary School Census 2013 is almost the same with the previous years' which was used in the Baseline Survey 2005. The APSC has tried to ensure covering all types of primary level educational institutions throughout the country in this census. The methodology of APSC 2013 is as follows:

Preparation of questionnaire

The questionnaire of Baseline Survey 2005, with a few modifications adjusting with emerging requirements, has been used in subsequent years APSCs. The Monitoring & Evaluation Division of DPE revised the questionnaire of APSC 2013 in consultation with the DPEOs, PTI Supers, UEOs, Instructors (URC), AMOs, AUEOs and HTs through a consultative process.

Data collection

The individual primary schools are the basic unit for data collection. The data collection questionnaire comprised of several segments like general information of the school location, students, teachers, physical infrastructure facilities and school management committees. The school census questionnaire along with instruction (in Bangla) for filling up the questionnaire has been distributed to schools through DPEOs, UEOs and AUEOs successively. The Head Teachers of schools have filled up the questionnaire and have forwarded to their respective AUEOs. The AUEOs have checked the filled up questionnaire of APSC 2013 to ensure that those have been properly filled up, then signed and submitted to their respective Upazila Education Officers. The UEOs also have checked, signed and forwarded the filled-up questionnaire to respective URC for data entry. Data collection from schools was carried out in the month of April to June 2013

Data Entry, Editing, Cleaning, Data Processing and Analysis

The UEO with the help of URC Data Entry Operators have completed the data entry and then submitted a soft copy of the data set to the IMD of the DPE. IMD then appends, edits, cleans and processes the data set.

The M & E Division of DPE decided that the entered data should go through another stage of checking for consistency and accuracy by the IMD. Following the advice and guidance of the experts and advisors of the Technical Committee on APSC and the System Analyst of DPE made a tabulation plan of the data and prepared the tables. Data analysis was undertaken by the M&E Division with the assistance of consultants and assigned officials for APSC.

Limitations of the Annual Primary School Census 2013

The Annual Primary School Census has been conducting since 2005 and started with only 4 types of schools (GPS, RNGPS, Community and Satellite Schools) and DPE is extending its coverage gradually. The data of APSC 2013 has been collected from 106,859 schools whereas 111,703 schools received textbooks free of cost. The schools outside the coverage of the APSC-2013 were not directly under the purview of DPE. Ensuring participation of schools especially private kindergartens and NGO schools are not an easy task and many of these institutions do not have formal institutional set

up in terms of land, physical infrastructure, and regular teachers and students enrolment. As a result, it is difficult to collect data from all types of schools. However, there will be attempts in the future to capture the missed out schools.

Past experience and plan for improvement of the APSC

Since 2005, the M&E Division has been publishing Annual Primary School Census Report each year. After a review of the process, the DPE management develops a plan to accelerate the preparation of the report and ensuring the timely dissemination, considering its increasing demand from different users. Starting from 2009, the Annual Primary School Census Report mainly presents the data tables of various agreed indicators. It is mainly a narrative report. In parallel, The M&E Division started to produce the Annual Sector Performance Report (ASPR) – an analytical report on primary education sub-sector based on APSC and other credible sources of data. The ASPR analyses in details the findings of the school census and other data sources focusing on the PEDP3 results framework. The APSC data collection, data processing and report quality is improving gradually.

The original data sets will be preserved in the IMD, DPE. Persons and organisations interested in further study or analysis of the data may request access to the required data resources from the IMD and M & E Division.

With the experience of APSC for the last few years, DPE has developed strategies to collect APSC data from all types of schools those who receive textbooks. So it is expected that gradually all types of primary level institutions will be covered in the upcoming APSCs. DPE has a plan to computerize the data collection and transfer of data by internet from schools to DPE HQ to accelerate the process and accuracy of the data. It is also planned that the total work of APSC from data collection to publishing the final report will be completed during the calendar year.

Organisation of the document

The APSC 2013 report is designed into 5 main chapters: 1. Introduction, 2. Pre-primary education, 3. Access and participation, 4. Internal Efficiency 5. Teachers Information and Annexure. The data is presented both in Tables and Figures to make them distinctly visible.

In preparation of the tables main considerations were the KPIs and PSQLs. Most of the tables arranged with gender segregated historical data starting from the base year 2005 to present the changes over the period. District and Division wise tables were also prepared to reflect the geographical differences for some main indicators.

Data validation

To validate the 2013 census data a sample survey was conducted in 600 sample schools (GPS-36, RNGPS-135, Community schools-35, Experimental schools-15 and Ebtedayee Madrasha-29) from 7 administrative divisions by the 'Foundation for Research on Educational Planning and Development (FREPD). The FREPD was hired by DPE for this purpose. The validation survey reported that the APSC estimates were reasonably good. The mean error (-0.45) was statistically insignificant. The study team suggestm that DPE does not require to revise the census findings. For specific school category, DPE may revise the estimates according to the correction factors suggested in the text. One of the limitations of the present validation survey is the small sample size – which should be increased in the future validation study.

Population projection

From 2005 to 2010, DPE used the BBS 6-10 years population data for calculating GIR, NIR, and GER & NER through projection of 2001 population census in preparing Annual Primary School Census (APSC). After that, the BBS conducted Population Census in 2011 and DPE used the Population Census-2011 data for calculating GIR, NIR, GER and NER applying the Sprague Multiplier for smoothing BBS 2011 census data for creating single year age population (0-14) with the consent of BBS. So the school age population for 2013 was projected considering the previous year population.

APSC and Bangladesh Bureau of Educational Information and Statistics (BANBEIS)

There are 24 types of primary educational institutions in Bangladesh. Of these, DPE controls only seven type of schools such as Government Primary Schools (GPS), Registered Non Govt Primary Schools (RNGPS), Non-Registered Non-Government Primary Schools (NRNGPS), Experimental Schools (schools attached to PTI), Community Schools, ROSC and Shishu Kallyan Schools.

However, the APSC collects data directly from other types of schools managed by MOE; such as Ebtedyee Madrasah, High Madrasah attached Ebtedyee Madrasah and High School attached Primary Schools. On the other hand, BANBEIS also collects data every year from the MOE managed schools but the age wise accurate enrolment data are not always available in BANBEIS report. However, the data collected in APSC has been reviewed by the technical committee, which includes members from BANBEIS and other organizations. BANBEIS data will be very useful to figure out the transition from primary to high schools. There will be collaborative efforts with BANBEIS to adjust with the data set for mutual benefit, particularly for data on transition from primary to high schools and also uniformity of categorization of disabled children.

Two Technical Committees

There are two technical committees for reviewing and advising on the methodologies and quality of APSC report.

Technical Committee in DPE

Technical Committee comprised of 13 members headed by Director General of DPE. The role of this committee is primarily to review the draft Annual Primary School Census Report and make fruitful advice/observations to improve the quality of the report. Then M &E Division revise the draft report following the observations of the Technical Committee. Finally DPE sends it to the MoMPE for review and approve by the National Committee on Primary Education Statistics. The structure of this committee is as follows:

1. DG, DPE, Chairman	9. Representative, NGO Bureau, member
2. DG, DSHE, member	10. Prof. Saleh Ahmed, Ex. VC of Jahangir Nagar University, member
3. DG, DNFE, member	11. Prof. Dr. M Kabir, Statistics Department of Dhaka University, member
4. DG, CPEIMU, member	12. Prof. Siddiquir Rahman, IER, Dhaka University, member
5. Director, M & E, DPE, member	13. DD (M&E), DPE, member Secretary
6. DS (Dev-1), MoPME, member	
7. Representative of BBS, member	
8. Director, BANBEIS, member	

The meeting of this committee was held in DPE on 23 March 2014 and approved the preliminary draft of APSC 2013 with some observations.

National Committee on Primary Education Statistics in MoPME

National Committee on Primary Education Statistics comprised of 12 members headed by the Secretary, MoPME. The role of this committee is for final review and approval of Annual Primary Schools Census Report. They may advise for corrections/adjustments if needed before finalizing the report. After approval by this committee, DPE print this report. The structure of this committee is as follows:

National Committee on Primary Education Statistics

1. Secretary, MoPME, Chairman	7. Joint Secretary, MoPME, member
2. Representative from MOE, member	8. DG, DPE, member
3. Secretary, Statistical Division, member	9. DG, DNFE, member
4. Member, Economic Infrastructure Division of Planning Commission, member	10. CPEIMU, member
5. Mr. Waliul Islam, Ex-secretary, BD, member	11. Director (M&E), DPE, member
6. Additional Secretary, MoPME, member	12. Deputy Chief, MoPME, member Secretary

The meeting of this committee was held in MoPME on 10 April 2014 and approved the draft APSC 2013 report with some suggestions to improve the report next year.

Share of primary education by type of institutions:

The Directorate of Primary Education directly controls seven types of schools: GPS, RNGPS, Experimental schools, Community school, NRNGPS, ROSC and Shishu Kallyan schools. In addition, there are other types of schools in Bangladesh, which are included in the Table 1.1:

Table: 1.1 Different Types of Primary Education Institutions, Teachers and Students in 2013

Schools Type	No. of schools	Teachers				Students			
		Male	Female	Total	% of Female	Boys	Girls	Total	% of Girls
1. Govt. Primary Schools	37700	76457	137334	213791	64.2	5193447	5370884	10564331	50.8
2. Regd.NGPS	22632	48911	40572	89483	45.3	2169786	2156108	4325894	49.8
3. Non-regd. NGPS	2799	3194	7573	10767	70.3	228459	215265	443724	48.5
4. Experimental Schools	56	28	199	227	87.7	5869	5630	11499	49.0
5. Ebtedayee Madrasha	2623	8473	1845	10318	17.9	177677	166443	344120	48.4
6. Kindergarten	14100	34982	49653	84635	58.7	981462	817038	1798500	45.4
7. NGO Schools	2101	1538	3152	4690	67.2	103728	108484	212212	51.1
8. Community Schools	1244	1055	3242	4297	75.4	101446	106080	207526	51.1
9. Attached to High Madrasha	5583	19607	3069	22676	13.5	434910	410528	845438	48.6
10. Primary Sections of High Schools	1245	3654	4436	8090	54.8	225038	242888	467926	51.9
11. Brac Schools	9683	272	9472	9744	97.2	84571	129590	214161	60.5
12. ROSC Schools	3830	730	3124	3854	81.1	46359	47634	93993	50.7
13. Shishu Kallyan Primary Schools	112	100	254	354	71.8	5234	5796	11030	52.5
14. Other Schools	3151	1731	1851	3582	51.7	22966	21652	44618	48.5
Total	106859	200732	265776	466508	57.0	9780952	9804020	19584972	50.1

A total of 1,06,859 schools of 14 broad categories covered in the APSC 2013 with a total number of students 1,95,84,972 of which 98,04,020 are Girls (50.1%). The total number of female teachers is 26,5,776 out of 4,66,508 teachers. The percentage of female teachers is 57 for all types of schools. See the Annex J for details list of different types of schools.

Figure 1: Types of Primary Level Educational institutions and their share in percentage

The Figure 1 shows the different types of primary schools in terms of percentage of total number of primary schools in the country. The figure shows that GPS 35.28%, RNGPS 21.18%, NRNGPS 2.62%, Experimental schools 0.05%, Community schools 1.16%, ROSC 3.58%, and Shishu Kallyan 0.10%. Comprising of seven categories of schools directly under DPE represents 64 % of all types of primary schools in Bangladesh.

Chapter Two

Pre-primary Education

PRE-PRIMARY EDUCATION

Introduction:

Pre-Primary Education (PPE) plays a vital role in ensuring timely enrolment in schools and also contribute to better learning of the children in subsequent years. It is very useful to prepare children for enrolment in formal primary education through pre-primary exposure. After completing Pre-Primary, a child adapts himself/ herself to the school environment and get prepared for formal education from grade 1 and onward. In this chapter, data regarding PPE is presented in following tables:

- Enrolment in Pre-Primary by division, gender and type of schools
- Enrolment in Pre-Primary by district and gender in GPS, RNGPS, NRRGPS
- Enrolment in Pre-Primary by District and Gender in Experimental schools, Ebtedayee madrasahs and Community schools
- Number of institutions with PPE by Division, District and Types of School, districts and divisions.

2. Pre-Primary Education

Table: 2.4. Special Need Children (Disabled) by type of disability and gender in Pre-Primary in 2013

Type of Disabilities	Boys	Girls
Poor Eyesight	2472	1915
Short of hearing	617	577
Intellectual/mental problem	392	303
Problem in speech	1604	1244
Physical Handicap	1223	993
Autistic	196	163
Others	245	203
Total:	6749	5398

In 2013, there are 81,798 schools where pre-primary classes have been introduced. The total number of learners in 2013 are 29,62,038, out of them 12,57,872 in GPS, 5,70,078 in RNGPS, 53,618 in NRNGPS, 99 in Experimental schools, 25,425 in Ebtedaiyee Madrashas, 26,224 in Community schools and 1,00,2393 in other types of schools. A total of 5,398 Girls and 6,749 Boys with Special Need enrolled in Pre-Primary in 2013..

Chapter Three

Access and Participation In Primary Education

Access and participation in Primary education

Introduction

Bangladesh is committed to achieve Universal Primary Education in line with the targets of the Millennium Development Goals, which envisages the provision of a quality basic education for all children by 2015.. Therefore, the primary education system in Bangladesh aims to maximise the enrolment of all primary school age (6-10 years) children of the country. This chapter presents the findings of Access to and Participation in Primary education in Bangladesh. In this chapter data grouped into categories of Enrolment in Grade I, New entrants in Grade I, Gross and Net Intake Rate, Enrolment in all types Schools, Gross and Net Enrolment, Grade wise Enrolment by Gender, Enrolment of special needs children.

Table 3.1: Enrolment in Grade 1 (All schools) By District and Gender in 2013

Single shift schools

The purpose of single shift schools is to increase the contact hours between the teachers and the students. To increase the number of single shift schools and thus to raise the number of contact hours between teachers and students was one of the PSQLs of PEDPII. Staggered schools-hours limit the opportunity for teachers to improve the quality of students' performance and, as a result, the efficiency of the whole system is adversely affected. Total number of single shift schools is 8,822 in 2013 out of 60,388 DPE managed schools (GPS, RNGPS and Experimental schools). There are 37,357 single shift schools in 2013 of which 26,697 are in other categories of schools.

Gender Parity in Enrolment:

A standard measure of gender inequality in enrolment is the Gender Parity Index, i.e. the ratio between the female and male enrolment rates. When the index falls below 1, there is disparity in favour of Boys, while it exceeds 1 there is disparity in favour of Girls. In 2013, the gender parity index was 1.002 for the GER and 0.99 for the NER.

Figure 3: Primary Education Gross Enrolment Rate & Net Enrolment Rate 2005-2013

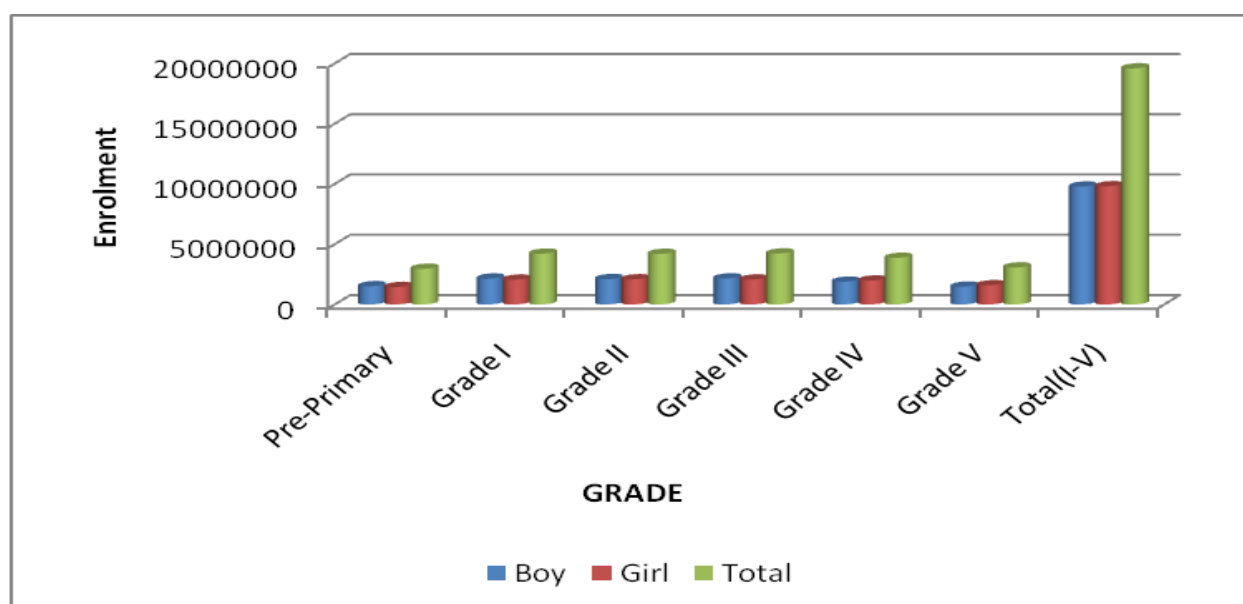

The GER indicates a degree of participation of all children irrespective of official schools age. The Net Enrolment Rate denotes a degree of participation in primary education of the official primary school age group. Table 3.9 shows the Net Enrolment. Tables 3.10 and 3.11 provide a comparison of GER and NER by gender and district. The report shows that the nationwide GER for Girls (110.5%) was higher than Boys (106.8%) and NER for Girls (98.4) and for Boys (96.2). It is accounted for by over age and under age children being enrolled, and is particularly significant for Girls. Table 3.12 reveals that the participation (GER) of Boys and Girls in primary education over the period of 2005-2013. It indicates that a steady rise in GER of both Boys and Girls over the period.

Table 3.12: Enrolment by Grade and Gender in 2013

Gender	Pre-Primary	Grade I	Grade II	Grade III	Grade IV	Grade V	Total(I-V)
Boys	1511580	2150031	2107490	2157753	1889552	1476126	9780952

Figure 4: Enrolment by Grade and Gender in 2013

Enrolment of Special Need Children (Disable)

Data on children with special needs in perspective of the inclusive education was collected in primary school census 2013. Five types of ‘mild’ disabilities were included in the questionnaire such as poor eyesight, hearing impairment, intellectual/mental problems, and speech problems and physically handicapped. Table 3.14 provides data on the enrolment of disabled children in GPS and RNGPS by sex and by type of disability. Table 3.15 shows the enrolment of special needs children over the period 2005-2013. From this table, it is seen that the enrolment of disabled children has steadily increased. This has happened due to continuous positive policy direction, sensitization through communication and social mobilization at the school-community level.

Chapter Four Internal Efficiency

INTERNAL EFFICIENCY

Introduction:

Internal efficiency is a measure of the extent to which a school system is making best uses of its resources and produce results in terms of children's continuation and completion of primary education cycle. The most efficient system would be one in which all children who enrolled progressed through the cycle, in this case, of five grades of primary education in five years. In other words, there would be no repetition and no dropout because of efficient use of teachers, classrooms and other resources.

In this chapter, data is presented on the most common indicators used to assess internal efficiency: Repetition rate, Dropout rate, Coefficient of Efficiency, Survival rate, Years input per graduate, Average student absenteeism etc.

Repeaters

Tables 4.1, 4.2, 4.3, 4.4 and Figure 5 show the relevant repetition information which are as follows:

Table 4.1: Repeaters in GPS by District, Grade and Gender in 2013

Table 4.8: Repetition Rate by Grade and Gender in 2013

	Grade I	Grade II	Grade III	Grade IV	Grade V	All grade
Boys	8.4%	7.2%	9.2%	7.6%	1.7%	7.3%
Girls	7.3%	6.7%	8.4%	7.2%	1.7%	6.5%
All	7.9%	6.9%	8.8%	7.4%	1.7%	6.9%

Figure 5: Repetition Rate by Grade and Gender 2013

In Tables 4.1 to 4.7 show the repeaters in GPS, RNGPS, NRNGPS, Ebtedayee Madrashas, and Community schools by district, grade and gender respectively. As shown in Table 4.1 and 4.2 the total number of repeaters in GPS and RNGPS nationally is higher for Boys than Girls, Table 4.7 shows that the total number of Boys' repeaters in all schools is higher than Girls.

Table 4.8 displays the repetition rate by grade and gender. The highest repetition rate is 8.8 in grade III, the lowest repetition rate is 1.7 in Grade V and the average across all grades is 6.9. Figure 5 provides a graphical representation of repetition rates by grade and gender.

Table 4.9 and Figure 6 display repetition rates for the period 2005-2013. Repetition rate was 10.2 in the years 2005 but started declining from 2012.

Table 4.9: Year Wise Repetition Rate by Gender 2005-2013

GENDER	2005	2006	2007	2008	2009	2010	2011	2012	2013
Boys	10.7%	11.4%	11.8%	11.7%	12.3%	12.8%	11.6%	7.7%	7.3%
Girls	9.6%	10.9%	11.3%	11.4%	11.8%	12.4%	10.6%	6.9%	6.5%
All	10.2%	11.2%	11.6%	11.6%	12.1%	12.6%	11.1%	7.3%	6.9%

Figure 6: Year wise Repetition Rate by Gender 2005-2013

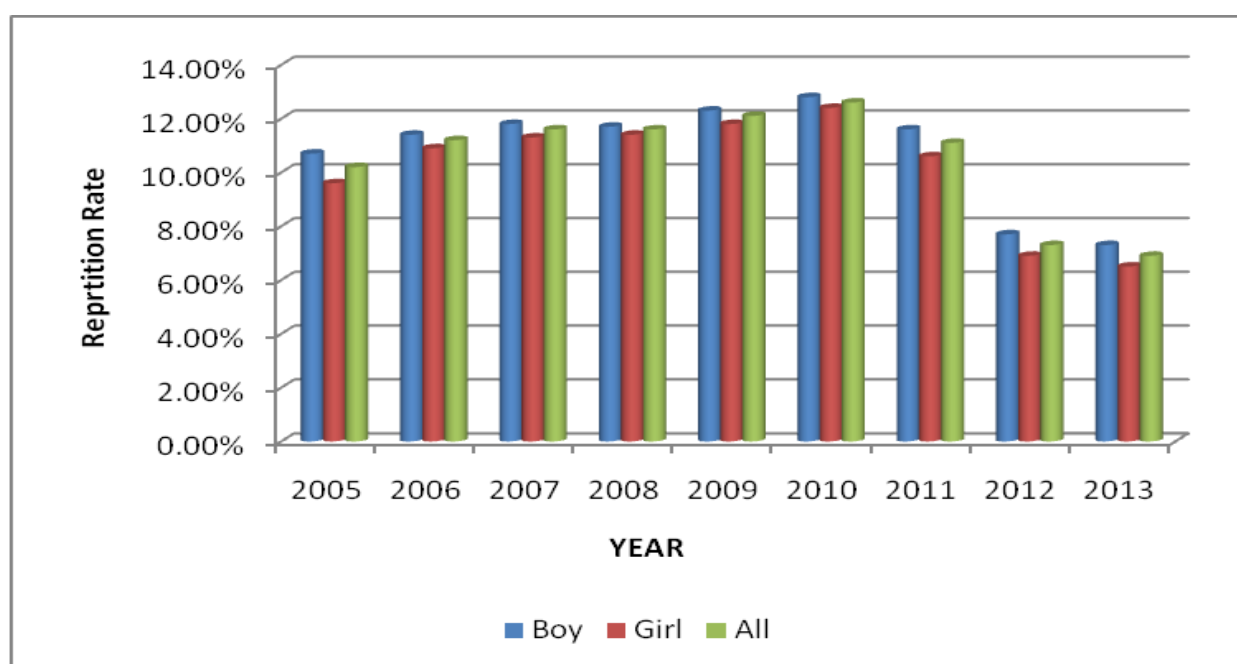

Table 4.10 Number of Repeaters by Grade and Gender in 2013

Grade	Boys	Girls	Total
Grade I	184101	153691	337792
Grade II	161866	142780	304646
Grade III	190390	178398	368788
Grade IV	130135	132454	262589
Grade V	24894	27440	52334
Total (I-V)	691386	634763	1326149

Table 4.10 displays grade wise gender segregated repetition for the year 2013. Total numbers of repeaters are 13,26,149 in all grades.

Table 4.11 Dropout Rate by Grade in 2013

Sex	Grade 1	Grade 2	Grade 3	Grade 4	Grade 5
Boys	2.5 %	5.8%	5.9%	8.1%	3.2%
Girls	0.4%	4.4%	4.0%	7.5%	1.4%
All	1.5%	5.1%	5.0%	7.8%	2.3%

Table 4.11 indicates that the highest level of dropout rate occurs in Grade IV 7.8% (for Boys 8.1 % and Girls 7.5%) while the lowest dropout rate is for Grade I, 1.5 % - for Boys (2.5%) and Girls (0.4 %) respectively.

Table 4.12: Dropout Rate by District and Gender in 2013

	Sylhet	39.6	26.5	33.1

For District, there is a wide variation in dropout rate - table 4.12 shows that the highest dropout rate of boys' is 49.0 at Kishorgonj and the lowest dropout rate of boys is 7.6 at Chittagong and Rangamati. The highest dropout rate of Girls is 49.5 at Netrokona and the lowest drop out rate of Girls is 7.2 at Chittagong.

Table 4.13: Year wise Dropout Rate (both Boys and Girls together) 2005-2013

Year	2005	2006	2007	2008	2009	2010	2011	2012	2013
Dropout Rate (%)	47.2	50.5	50.5	49.3	45.1	39.8	29.7	26.2	21.4

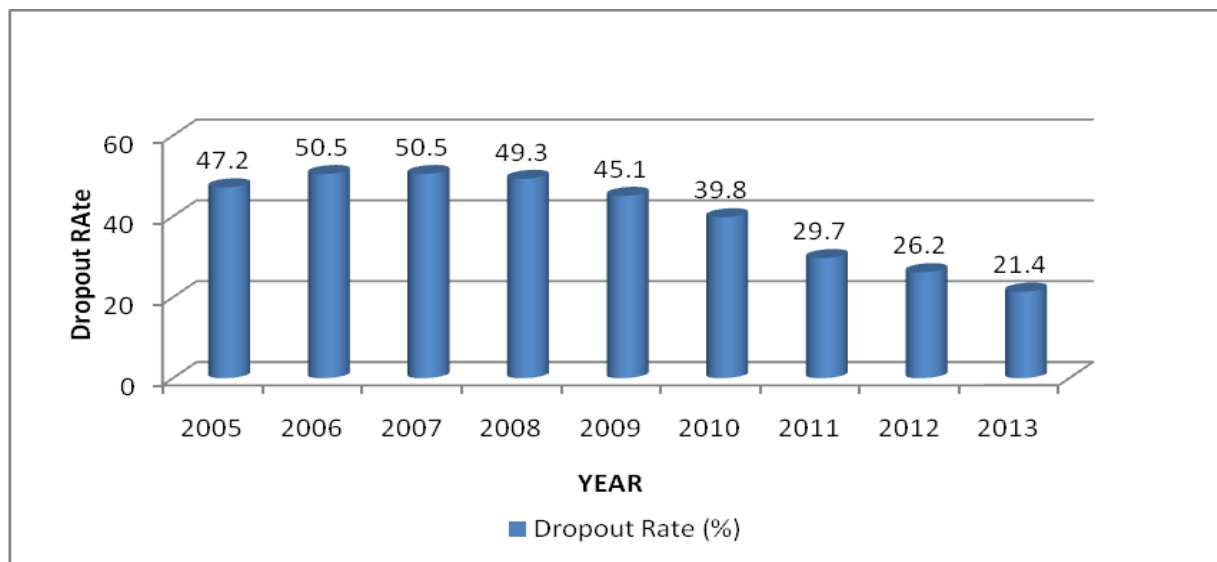

Figure 7: Year wise Dropout Rate 2005-2013

Table 4.13 and Figure 7 are the comparative figures of dropout rate for the period 2005-2013, which indicates gradual decrease each year. It is 21.4% in 2013 while it was 47.2% in 2005.

Survival Rate

Survival rate up to Grade V of primary education is of particular interest because the completion of at least four years of schooling is commonly considered a prerequisite for a sustainable level of literacy. Table 4.14 and Figure 8 have shown the comparative picture of survival rate from 2005 to 2013. The survival rate of Girls always is higher than Boys. Table 4.22 shows the survival rate during 2005-2013 by gender and district.

Table 4.14: Year and gender wise Survival Rate 2005-2013

Year	2005	2006	2007	2008	2009	2010	2011	2012	2013
Boys	51.7	47.1	48.9	52.9	57.1	65.9	77.0	73.5	77.7
Girls	56.1	53.3	54.9	57	62.2	68.6	82.1	77.0	83.3
All	53.9	50.2	51.9	55.0	59.7	67.3	79.6	75.3	80.5

Figure 8: Year wise Survival Rate 2005-2013

Coefficient of Efficiency

The Coefficient of efficiency is a synthetic indicator of internal efficiency of an education system. It summarizes the consequences of repetition and dropout on the efficiency of the educational process in producing primary school graduates. Table 4.15 and Figure 9 provide a comparison of the coefficient of efficiency during 2005-2013 which indicates a gradual improvement over the years. It is clear from these two tables that the coefficient of efficiency for Girls is higher than Boys.

Table 4.15: Year wise Coefficient of Efficiency (%) 2005-2013

Year	2005	2006	2007	2008	2009	2010	2011	2012	2013
Boys	58	56.6	56.5	57.5	59.1	62.8	67.7	75.6	77.3
Girls	63.2	61.3	61.1	59.1	62.8	61.8	70.5	79.2	82.0
All	60.6	59.0	58.8	58.3	61.0	62.3	69.1	77.4	79.7

Figure 9: Year wise Coefficient of Efficiency 2005-2013

Year Input per Graduate

The 'year input per graduate' provides a measure of 'wastage' in a primary education system in terms of additional to ideal student years spent to produce a primary graduate. It takes into account repetition and dropout rates. The ideal number of year input per graduate is five years as the primary education cycle is five years from grade 1 to grade 5 in Bangladesh. Table 4.16 and Figure 10 provide a comparison of year input per graduate during 2005-2013. Over all year input per graduate is steadily decreasing from 8.3 years in 2005 to 6.3 years in 2013. Specifically year input per graduate of Boys is higher than Girls in general. In table 4.23, there is a comparison of year input per graduate during 2005- 2013 by gender and district.

Table 4.16: Years Input Per Graduate 2005-2013

Year	2005	2006	2007	2008	2009	2010	2011	2012	2013
Boys	8.6	8.8	8.9	8.7	8.5	8	7.4	6.6	6.5
Girls	7.9	8.2	8.2	8.5	8	8.1	7.1	6.3	6.1
All	8.3	8.5	8.6	8.6	8.3	8.1	7.3	6.5	6.3

Figure10: Year wise Input Per Graduate by Gender 2005-2013

Table 4.17: Internal Efficiency in 2013

	Repetition rate in all grades (%)	Dropout rate (%)	Survival rate to Grade 5 (%)	Coefficient of Efficiency (%)	Year input per Graduate
Boys	7.3	24.9	77.7	77.3	6.5
Girls	6.5	17.9	83.3	82.0	6.1
All	6.9	21.4	80.5	79.7	6.3

The overall Internal efficiency is measured by the Repetition rate, Drop out rate, Survival rate, Year input per graduate and the Coefficient of efficiency as reflected in Table 4.17.

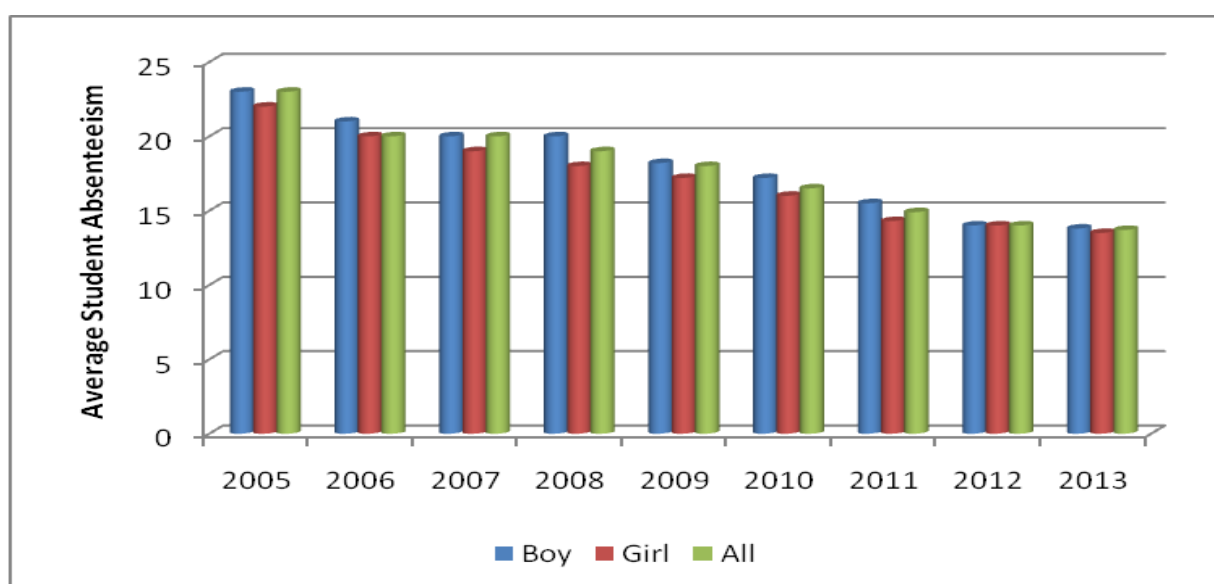

Average Student Absenteeism

In Table 4.18 and Figure 11 has shown the average student absenteeism in GPS, RNGPS and Community Schools for 2013 which is 14%. In the Baseline Survey (2005) it was 23%. Actually the attendance rate of both boys and Girls have been improving steadily since 2005.

Table 4.18: Average Student Absenteeism by Gender 2005-2013

Year	2005	2006	2007	2008	2009	2010	2011	2012	2013
Boys	23	21	20	20	18.2	17.2	15.5	14	13.8
Girls	22	20	19	18	17.2	16	14.3	14	13.5
All	23	20	20	19	18	16.5	14.9	14	13.7

Figure 11: Average Student Absenteeism by Gender 2005-2013

Primary Education Completion Examination Results

Since 2009 instead of Scholarship Examination, DPE introduced the Primary Education Completion Examination where all the students of grade V are eligible to take part in the grade V completion exam. In 2009 participated a total of 1,979,895 students and the pass rate was 88.84% and in 2013 participated 2,519,032 students and the pass rate was 98.58%.

Table 4.19: Primary Education Completion Examination Pass Rate by year 2009-2013

Year	Number of students participated	Absent	Pass Rate (%)	
			Total	Girls
2009	1,979,895	156,430	88.84	87.51
2010	2,156,721	216,390	92.34	91.98
2011	2,316,521	130,774	97.3	97.08
2012	2,481,119	160,784	97.35	97.19
2013	2519032	120013	98.58	98.52

Note: Madrasha students Figure not included in this table

Chapter Five Teachers Information

TEACHERS INFORMATION

Introduction:

Teachers are the key persons to provide and ensure quality education in the schools. In this chapter, teachers' information is shown in various tables as follows:

- ❖ Numbers of Teachers by Gender and Division, GPS, RNGPS, NRRNGPS, Experimental Schools, Ebte dayee Madrasha and Community Schools.
- ❖ Numbers of teachers by Gender and District, GPS, RNGPS, NRRNGPS, Experimental Schools, Ebte dayee Madrasha and Community Schools
- ❖ Pupil Teacher Ratio by type of schools and District
- ❖ Year wise Pupil Teacher Ratio, 2005-2013
- ❖ Number of C-in-Ed trained teachers by gender and Division, GPS, RNGPS, NRRNGPS, Experimental . Schools, Ebte dayee Madrasha and Community Schools
- ❖ Number of C-in-Ed trained teachers by gender and District in GPS, RNGPS, NRRNGPS, Experimental Schools, Ebte dayee Madrasha and Community Schools

Detailed information is furnished in the following pages of this chapter.

Table 5.1 Number of Teachers by Division and Gender in GPS, RNGPS and NRRNGPS in 2013

Division	GPS Teacher				RNGPS Teacher				NRRNGPS Teacher

Note: Other schools include all schools excluding GPS, RNGPS, NRRGPS, Experimental and Community schools and Ebtedayee Madrashes. See annex J for the detail list of other schools.

The highest percentage of female teachers in all types of schools is 69% in Narayangonj District and the lowest percentage of female teachers in all types of schools is 37% in Bandarban District.

Student -Teacher Ratio (STR)

Student-Teacher Ratio calculated based on working teachers and enrolled children in schools without considering double shifts in a staggered system. The PEDP-II target was to achieve a STR of 46:1 in all schools by 2009 but it was 53:1 in 2011 and 42:1 in 2013 of all types of schools whereas in GPS and RNGPS is still 49:1. Table 5.6 shows the district wise comparison of STR by types of schools and district. Table 5.7 and Figure 13 & 14 show the comparative study of STR during 2005-2013.

C-in-Ed Training of teachers:

Primary schools teachers are supposed to have one-year “Certificate-in-Education (C-in-Ed)” training which prepares them in pedagogical discipline. For various reasons, a large number of teachers are working in schools without receiving this training. PEDP-3 planned to provide this training to all the teachers in the schools. Table 5.8 shows the C-in-Ed Trained teachers by sex, division (GPS, RNGP, NRNGPS, Experimental and Community schools) and Table 5.11 by sex, district (GPS, NNGP, NRNGPS, Experimental and Community schools).

Chapter Six Annexes

Annex A: Key Performance Indicators in 2013

The objectives of APSC 2013 were to collect necessary data for the measurement of Key Performance Indicators (KPI) to compare progress with the baseline report of PEDPII. This chapter provides major findings with respect to KPIs from the Annual Primary Schools Census 2013. However, the following table (Annex A. 1) shows only the national figures for the KPIs.

Table A.1: List of Key Performance Indicators (KPIs) of PEDP3

SL.	Key performance indicator	Achievement 2013			Source of data	Remarks
		Male	Female	All		
1	Level of achievement in Grade 3: mean score (Boys and Girls) a. Bangla b. Mathematics				NSA report	N/A
2	Level of achievement in Grade 5: mean score (Boys and Girls) a. Bangla b. Mathematics				NSA report	N/A
3	Grade 5 examination pass rate (Boys and Girls)	98.62	98.54	98.58	Grade 5 exam report	N/A
4	Number of children out of schools (Boys and Girls) 6–10 years old and 11–14 years old				HIES/Education Household Survey (EHS)	N/A
5	GER, primary education (Boys and Girls)	106.8	110.5	108.6	APSC	
6	NER, primary education (Boys and Girls)	96.2	98.4	97.3	APSC	
7	[Participation] Gender parity index of GER			1.002	APSC	
8	[Participation] NER – Range between top 20% and bottom 20% of households by consumption quintile				HIES/EHS	N/A
9	Upazila-level composite performance indicator a. Annual improvement of 20% lowest performing Upazilas b. Range between top 10% and bottom 10% of Upazilas				ASPR	
10	Number and types of functions delegated to districts, Upazilas and schools				Admin	N/A
11	Expenditure of block grants (conditional and unconditional) for Upazilas and schools				P&D	N/A
12	Completion rate, primary education (Boys and Girls)	75.1	82.1	78.6	APSC	
13	Dropout rate by grade				APSC	
	Grade 1	2.5	0.4	1.5		
	Grade 2	5.8	4.4	5.1		
	Grade 3	5.9	4.0	5.0		
	Grade 4	8.1	7.5	7.8		
	Grade 5	3.2	1.4	2.3		
14	Number of input years per graduate	6.5	6.1	6.3	APSC	
15	Percentage of schools that meet composite primary schools-level quality indicators				ASPR	

Annex B: Primary Schools Quality Levels (PSQL) Indicators in 2013

The Primary Schools Quality Levels (PSQL) defines a minimum standard of inputs to all primary schools that are believed to have a positive impact on the quality of primary education in the country. This minimum standard of inputs for schools has been agreed between the Government of Bangladesh (GOB) and the Development Partners supporting PEDP 3. It means that GOB has committed itself to providing to all primary schools in the country the necessary inputs to bring each individual schools to a minimum level of physical facilities as per PSQL standards. The APSC 2010 collected data to assess the present situation in schools with respect to PSQL. This chapter provides major findings with respect to PSQLs from the Annual Primary Schools Census 2010. The findings with respect to various PSQL are reported for GPS and RNGPS at national and upazila levels. However, only the national figures for these PSQL are included in Annex B Table A.2.

Table A.2: List of Primary Schools Quality Level Indicators (PSQLs) of PEDP3

SL.	Monitoring Indicator	Achievement 2013			Data Source	Remarks
		Male	Female	Total		
1	Percentage of schools which received new textbooks within the first month of the year			99	DPE/Admin (Book Distribution)	
2	Percentage of (assistant and head) teachers with professional qualification (C-in-Ed/Dip-in-Ed, B.Ed., M.Ed.)	86.63	72.70	90	APSC	
3	Percentage of (assistant and head) teachers who receive continuous professional development training			89	APSC	
4	Number of enrolled children with disabilities (GPS & RNGPS)	45,858	36,850	82,708	APSC	
5	Percentage of schools with separate functioning toilets for Girls			64	APSC	
6	Percentage of schools with at least one functioning toilet			83	APSC	
7	Percentage of schools with potable water			74	APSC	
8	Percentage of schools which depend on water points for water where the water point is in working condition			68	APSC	
9	Percentage of schools which have a functioning water point that have potable water			83	APSC	
10	Percentage of classrooms that are in good condition			76	APSC	
11	Percentage of schools that meet the SCR standard of 40			21	APSC	
12	Percentage of standard-size classrooms (26'x19'6") and larger			38	APSC	
13	Percentage of classrooms which are in <i>pacca</i>			97	APSC	
14	Percentage of head teachers who received training on schools management and leadership training			65	APSC/Training Division	
15	Proportion of SMC whose members were trained (at least three members)			n/a	APSC/Training Division	No provision of SMC training in the PEDP3
16	Percentage of schools that meet the STR standard of 46			51	APSC	
17	Percentage of Number of schools (GPS) with pre-primary classes			95	APSC	
18	Percentage of schools which receive SLIP grants			62	APSC	

Annex C: Year wise comparison of some key Indicators 2005-2013

SL. No.	Key Performance Indicators	2005	2006	2007	2008	2009	2010	2011	2012	2013	Target
1	Gross enrolment rate [EFA 5] (%)	93.7	97.7	98.8	97.6	103.5	107.7	101.5	104.4	108.6	
2	Net enrolment rate [EFA 6] (%)	87.2	90.9	91.1	90.8	93.9	94.8	94.9	96.7	97.3

ANNEX F: Final Report on Data Validation Survey 2013

Extract From Executive Summary

DPE has been implementing the PEDP II since 2003, and PEDP III since 2011. The result of the PEDP III is monitored through EMIS. The main source of information is annual schools census. Census collects information on important variables such as enrolment, attendance, completion, repetition, number of teachers, their education, training, experience and facility available at schools and other important information.

The validation survey is a standard practice. The validation survey is carried out to know the quality of the census data. The DPE started validation of schools census since 2010. The validation of primary schools census 2011 was the second and the present one is the fourth.

The objectives of the validation survey 2013 are:

- To assess the quality of census data of ASC 2013 through a sample survey from a nationally representative random sample of schools.
- To assess the level of accuracy of selected indicators.
- To provide recommendations to be used as a reliable basis for appropriate policy decision.

Considering many constraints including the fund available for the survey, study team was asked to have the sample size $n = 600$. The 600 sample schools were allocated to: GPS = 361, RNGPS = 135, RNGPS = 25, CS = 35 and Experimental Schools = 15, EM = 29. The validation survey collected data using the questionnaire similar to that used in VS 2013. The Survey data collection started on 10 November, 2013, and completed on 31 November, 2013, data analysis completed on 31 December, report writing on 22 January 2014.

The census estimate \bar{x}_c is considered providing valid estimate if the difference $\bar{x}_c - \bar{x}_s$ is statistically insignificant. \bar{x}_c Is the sample mean of census data and \bar{x}_s is the sample mean of validation survey data.

The census estimate needs correction if $\bar{x}_c - \bar{x}_s$ is statistically significant,

The estimate of $X = X_c \left(\frac{\bar{x}_s}{\bar{x}_c} \right)$ in case of total off X .

The estimate of \bar{X} is $\bar{X}_c (CF) = \bar{X}_c \left(\frac{\bar{x}_s}{\bar{x}_c} \right)$ in case of \bar{X} , the population mean,

Where correction factor $CF = \frac{\bar{x}_s}{\bar{x}_c}$ the ratio

If $CF = 1$, correction of census estimate is not required and if $CF \neq 1$, Then correction of census estimate is required.

The census provides under estimate if Correction Factor is greater than one. The census provides over-estimate if Correction Factor is less than one.

From Validation, report reveals that there is no error in reporting enrolment in case of 56% schools. However, 44% schools had either over-reported or under-reported. About 20% over reported while 24% under reported. The variation between types of schools has been observed.

The **mean error is -0.45** students per schools. However, the difference between census mean and validation survey mean is not statistically significant.

Given the above, the DPE is not required to revise its enrolment data by multiplying census estimates by respective correction factors.

DPE should take necessary measures to eliminate the reporting error. The validation survey suggests that there is a scope for improving EMIS at schools level.

Correction of class wise enrolment is not required. Reporting error is statistically insignificant. Reporting error by schools should not be overlooked. The estimates may be adjusted according to survey findings.

More than 90% of all schools now offer pre-primary education. From Validation, report reveal that correction of enrolment of baby class is not required.

In case of enrolment of children with special needs, the quality of census data is good. Correction of census data is not required.

Census data on attendance are not close to validation data for some categories of schools. Adjustment is required for these schools.

The average repeaters in census 2013 were very close to validation survey data. The difference between census average and validation survey average is statistically insignificant.

Average students passed in terminal examination indicators based on census data and validation survey data are very close. Adjustment is not required.

Magnitude of error in age specific enrolment is confirming high level of inaccuracy for age 6 and 10.. Correction to ASC 2013 is required for these ages. Teachers of all categories of schools need training on how to conduct catchment area census.

Census data on number of teachers working on 31 March are very close to VS data. Correction of ASC 2013 data by types of schools is not required.

Difference between sample means of ASC 2013 and VS 2013 with regard to total trained teachers is insignificant. Correction for adjustment is not required.

The difference between average number of rooms in ASC 2013 and VS 2013 is not small. Correction factors should be used to arrive at adjusted figures.

Quite surprisingly, the average number of blackboard in VS 2013 was higher than the census average. Correction of census data is required. It is also necessary to know the reasons for under reporting in ASC 2013.

As regards number of useable toilets, the census data is found to be accurate and therefore revision is not required.

Average number of safe drinking water source of ASC 2013 was very close to average number of VS 2013. No correction is suggested.

The census reported data and validation data on number of SMC members are very close and adjustment is not required.

Both sources reveal nearly 50% schools received SLIP grant.

As such, adjustment is not required.

Only 21 GPS out of 237 sample GPS have one computer each. Other schools were found without one computer in both census and validation survey.

Census reported data on computer is not required any adjustment.

Most schools have not yet developed the EMIS in the schools. They need orientation/ training on the maintenance of EMIS, which is very important to assess schools performance parameter. The Head Teachers of schools should be given orientation /training on how to maintain EMIS in the schools.

Definition of some variables such as students with special needs, useable chalkboard and safe drinking water should be given to all HT.

The overall quality of the ASC 2013 is reasonably high.

Conclusion

For most indicators such as:

enrolment; class-wise enrolment; enrolment in pre-primary; repeaters; number passed in class V completion examination; number of teachers; no. of trained teachers; usable toilets; source of safe drinking water; SMC members; schools receiving SLIP grant; the relative difference between census data and validation data is found very small. These estimates are reasonably good. Revision is not required for these estimates. For indicators such as no of blackboard, no of classrooms and age specific enrolment, the difference is statistically significant and these indicators need correction. For specific schools category, DPE may revise the estimates according to the correction factors suggested in the text. One of the limitations of the present validation survey is the small sample for some categories of schools.

The data-base of 2013 ASC seems to have excluded some schools. These schools need to be identified and included in the data-base of ASC 2013.

The quality of census data 2013 is found better than that of 2012.

The validation survey 2013 confirms high quality of reported data of ASC 2013.

ANNEX G: Data Cleaning As Per Manual

Since 2005 DPE has been carrying out an annual census of the primary schools under its jurisdiction. The annual primary schools census is the main source of information on assessing progress in the implementation of government policies and programmes in primary education.

According to the Framework for Assessing the Quality of Education Statistics that was proposed by the World Bank and UNESCO Institute of Statistics in 2003, there are five quality dimensions of the way in which data are collected, processed, and disseminated: integrity, methodological soundness, accuracy and reliability, serviceability, and accessibility.

In order to increase the quality of its education statistics and meet internationally recognised good practice, DPE has recognised the need to standardise the way in which the data received by the schools is processed. As a first step in that direction, it was agreed that it was necessary to document and publicise the method used to clean the raw dataset. This was the purpose of this manual. For APSC 2013 this manual has been tried to be followed for the first time.

Cleaning APSC data is a labour intensive and lengthy process and one, moreover, that is only partially successful in correcting the errors in the data. The answer does not lie in data cleaning alone but in introducing proper validity checking to the data entry program and directly to the database tables and in securing the database to avoid the current widespread practice of typing data directly into the database tables.

The main data entry screen of the APSC data entry program provides a facility to check for missing data including:

1. Check for imbalance in enrolment for STD_ADMISSION and AGE_WISE_ADMISSION
2. STD_ADMISSION without matching TEACHER_POST
3. STD_ADMISSION without matching TEACHER_INFO
4. STD_ADMISSION without matching TOILET_WATER_DETAIL
5. STD_ADMISSION without matching ROOM
6. STD_ADMISSION without matching BOOK
7. STD_ADMISSION without matching SLIP
8. STD_ADMISSION without matching STD_ATTEN

It is the responsibility of the data entry operator at the UEO to do these checks with AUEOs and UEOs signing off on the process. The set procedure requires each AUEO to check the manually completed formats sent in from the Head Teachers of his/her respective cluster. After verifying the data, the AUEO gives it to the Upazilla Resource Centre (URC) data entry operator or the computer operator (LDA cum Computer Operator) at the UEO for electronic data entry. It is the duty of the AUEO to continue checking errors on-screen during the data entry process at the URC. After completing data entry, the Data Entry Operator/LDA cum Computer Operator sends the data to the UEO. The UEO has responsibility to check 20% of the data on a sample basis. If he/she is satisfied with the quality of the data, it is sent onto the DPEO. The Assistant Monitoring Officer (AMO) of the DPEO also has a responsibility to check 20% of the data and to compile the data from all Upazila into one folder and send to IMD by CD / pen drive / email. The task of IMD should then be merely that of aggregating the countrywide data.

However, despite all these checks and balances, there are significant amounts of missing data in the APSC files sent from the field. Hence it is imperative to rerun the above checks plus the additional ones identified for each schools in the Upazila as soon as the data is received by IMD. If missing data is discovered in time, the UEO can be requested to collect the data once more from the schools or to instruct his/her staff to re-enter the data.

In compliance with the protocol of DLI No 8 Annual Primary Schools Census (APSC), this is a summary of the internal data validation process for APSC 2013. For APSC 2013, the Information Management Division (IMD) and the Monitoring and Evaluation Division (M&E) have jointly developed a mechanism for checking the data at source and the APSC data entry software itself includes a number of checks for missing and data. The steps below summarise the steps taken to clean schools data, following the newly adopted APSC Data Cleaning Manual;

Stage One: A rough check of data completeness and accuracy

Simple queries are run against the data which identify data combinations which are simply not possible (i.e. schools where the numbers of children applying to sit for the terminal exam are less than the numbers who sat the exam or schools having no classrooms). Missing or duplicate schools are also identified. Duplicate data for schools is often caused by changes in Upazila (and even District and Division) boundaries. Where data errors at this level are identified, the data will be returned to UEOs with a request to resubmit.

Stage Two: Cleaning Static Schools Data

Information in the gen_info table which includes static schools data needs to be cleaned first because this is the central table of the database. All other tables link to gen_info through the unique schools identifier [SCH_CODE]. Most of the problem encountered in this data are the result of incomplete data which can be rectified by making basic assumptions based on existing patterns in the data (i.e. the distance from the UEO can be estimated based on the union in which the schools is located and the accessibility can be guess based on the proximity to the sadar Upazila). For a list of rules to follow, check the APSC Data Cleaning Manual 2014. One issue of significance is that of schools that close down. Where dynamic data (e.g. student enrolment) is not provided for a schools listed in gen_info it may be necessary to check with the UEO if the schools continues to function.

Stage Three: Cleaning Student Data

During this stage, IMD officers cross-check data in the STD_ADMISSION and AGE_WISE_ADMISSION tables. Ideally, the data in these two tables should be consistent. Where it is not, it may be necessary to: 1) populate the AGE_WISE_ADMISSION table from data in the STD_ADMISSION table based on age distribution norms established in previous years or; 2) populate the STD_ADMISSION table from data collected in previous years using regression equations generated from an analysis of growth trends over the previous three years of data collection. The same measures should be taken where there are high level of internal inconsistency in the data (e.g. where the enrolment at any grade level is more than three times higher than that in the grade level immediately below it). Further details and base data to support both options are given in The APSC Data Cleaning Manual.

Data for disabled students is cross-checked against district level data for the incidence of each type of disability established by the most recent BBS HIES census. Where there is significant variation, the UEO will be requested to resubmit the data.

Examination results and repeater data are checked to see if they are in similar proportion to that in previous years. Where there is a significant discrepancy the UEO will be requested to resubmit. Catchment area analysis data is checked against the data in the AGE_WISE_ADMISSION table. Where there is a significant discrepancy the UEO will be requested to resubmit.

Stage Four: Cleaning Teacher Data

There is often some confusion between teacher posts and actual teacher employment. Hence the first step in cleaning the TEACHER_INFO table is to delete all records where the name of the teacher is blank or is given as "vacant post" or some variant thereof. After this, teacher numbers and designations can be compared with the teacher posts allocated to the schools and recorded in the TEACHER_POST table. Other than this, the data cleaning process involves checking whether there are values recorded in fields which are outside the allowable range.

Stage Five: Cleaning facilities data

There are two tables that fall into this category. TOILET_WATER_DETAIL and ROOM. As the former table includes both raw data and summary data in the same records, there can be inconsistencies in figures and these should be checked for. Details of common errors are given in the APSC Data Cleaning Manual 2014.

It is important to have accurate details about the number and size of classrooms at a schools since the number of classrooms that meet the standard is a PSQL. Since facilities data is relatively static, it is possible to import the previous year's data where no data has been provided from the schools. It is not possible for any schools not to have at least a single classroom. Hence the first step is to identify schools that have provided no or incomplete room data by making a query to identify any schools without classrooms. For each of these schools, classroom data can be imported from the previous year's data.

Stage Six: Cleaning Textbook Distribution Data

Data related to the annual distribution and receipt of textbooks is stored in the BOOK table. Normally all textbooks are delivered together so data entry staff tend to record the date of delivery for the first textbook in the list only. This is the Bangla text for class 1. The date recorded for this textbook can be assumed to be the date of delivery of all texts. More accurate data is available in the Textbook Distribution Database and work is currently being done to make records in this database compatible with records in the APSC database.

Stage Seven: Cleaning SMC Data

Data related to the Schools Management Committee (SMC) is stored in the SCHOOLS_MANAGEMENT table. There are no related tables in the database so this data can only be checked for internal consistency. Details are given in the APSC Data Cleaning Manual 2014.

The mechanism, procedures and internal organizational arrangements for APSC data cleaning have taken a major stride forward in 2013. In order to continuously improving the data quality of APSC, the data cleaning procedures will be under ongoing review and refinement. Data quality control measures put in place at Upazila and District level are comprehensive and well-designed but there is a low level of conformity to these guidelines. In the future, more responsibility will be placed on AUEO/ UEO on the data quality control. Data entry operators / LDA cum Computer Operators at Upazila level need to be made to feel more accountable for the quality of the data entry process by being involved in the data checking and cleaning process through their UEO.

ANNEX H: Internal Validation System in existing Software of APSC 2013

The internal validation mechanism system that exists in the present software of ASC. These are given below:

1. There is a validation system to compare two tables of std_admission and age_wise_admission to check total enrolment and age wise enrolment of a specific schools;
2. There is a validation system to check the not entered data (blank entry) in the field of approved teacher number of a schools;
3. There is a validation system to check the not entered data (blank entry) in the fields of room information of a schools;
4. There is a validation system to check the not entered data (blank entry) in the field of toilet and water information;
5. There is a validation system to check the not entered data (blank entry) in the field of SLIP information of a schools;
6. There is a validation system to check the not entered data (blank entry) in the field of ICT information of a schools;
7. Existing Validation check system for
 - Grade I student is much higher than Grade II;
 - Grade II student is much higher than Grade III;
 - Class V appeared is much higher than 2013 class V;
 - Working teachers are higher than approved post;
 - Repeaters are higher than the admission.

Also have some validation on

- Upazila enrolment;
- Upazila working teacher;
- Single shift schools.

In support of these validation system existence, some screen print are given in the following pages:

Annex K: Contact Hour in Primary Schools

The Annual primary school census does not collect directly relevant information from school. Directorate of primary education (DPE) has published calendar/Schedule for Primary education time schedule including holidays.

- From the calendar -2013, found that 127 days are holiday and 238 days are working in primary school.
- Time schedule in double shift for grade I and II is 9.30 - 12.00 P.M and grade III, IV and V is 12.00 - 4.15 and Thursday time schedule is 12.00-2.30 PM.
- Time schedule in single shift for grade I and II is 9.30-1.30 PM and Thursday days time schedule is 9.30-12.30 PM and Grade III, IV and V is 9.30 -4.15 PM, for Thursdays is 9.30-2.30 PM.

Based on above information, the contact hours are estimated as the followings:

Grade	Contact Hour	
	Single Shift School	Double shift school
I and II	863	595
III,IV and V	1537	843
